This screenshot shows the main trading interface. At the top, there's a navigation bar with links for Trading, Copy Trade, Promotional, Commission, Wallet, Setting, and My Partners. A user profile 'Hi Username' is visible on the right. Below the navigation is a 'TRADING' section with tabs for ETH / USDT, BTC / USDT, XRP / USDT, LTC / USDT, and BNB / USDT. The ETH tab is selected, showing a candlestick chart for the ETH/USDT market. The chart displays price action from 03:57 to 04:04 on October 20, with a current price of \$412.50. To the right of the chart is a pie chart showing a 65.9% green segment and a 34.1% red segment, and a grid of colored circles representing market sentiment. Below the chart are buttons for 'Amount', 'BUY', and 'SELL'. A section titled 'Choose amount you want to buy / sell here' includes buttons for 10, 20, 50, 100, 500, and 1000. Further down are two tables: one showing recent trade history and another showing a list of copy trades.
